

Compressed air filters in modular design with condensation drain, manually operated. Filter element of Borosilicate microfiber fleece. Body of aluminium (black anodized). Bowl of brass. Test certificate for pressure bowl included. Micro-filters guarantee as the second stage best possible quality with an effectiveness of $99,9999 \%$ based on $0,01 \mu \mathrm{~m}$. Residual oil content $0,01 \mathrm{ppm}$. The filter element with a pore size lower than $0,01 \mu \mathrm{~m}$ are of borosilicate filter with supporting casing made of stainless steel (V2A) and foamed plastic cover. Flow passes from inside to outside. Replacement after 6 months.

*** Condensate drain under pressure only to 25 bar range
For maximum working life we recommend using a
normal filter 40 baras first stage.
